

# PROJECT LIFE™

A graphic logo for Project Life, consisting of three overlapping, colorful shapes (green, blue, and orange) that resemble a stylized 'L' or a play button.

Pursuing **PASSION**, finding **PURPOSE** and making an **IMPACT** through authentic education and meaningful employment.

Butler Tech is pleased to offer the opportunity to replicate Project LIFE™ in your community.

Replication includes:

- A planning preparation framework
- Implementation training at your location for designated staff and program stakeholders
- Interactive, online portal that provides everything you need to implement the program to fidelity
- On-going consultation and support from a highly qualified team of transition-to-work specialists

Replication funding is available through a generous grant from our friends at the Mitsubishi Electric America Foundation.

For more information about replication, visit [btprojectlife.org](http://btprojectlife.org).

Project LIFE™ provides students with developmental disabilities the opportunity to learn and strengthen skills that are high predictors of greater adult independence leading to a future of integrated employment in their community.

Two levels of transition-focused course of study assessments, in combination with a comprehensive employment skill rubric and work performance reports, provide the data needed to assist students with a smooth transition to adulthood.

Developed by a team of special education transition specialists, Project LIFE™ provides the framework and resources needed to:

- Meet and exceed IDEA compliance
- Meet Employment First best practices
- Meet WIOA's pre-employment transition skill sets

Utilizing evidence-based practices, the combination of Project LIFE™ and Project SEARCH® (developed, and licensed through Cincinnati Children's Hospital) provides a comprehensive, multi-year continuum of transition programming that leads to greater individual growth, independence and competitive employment.

Let us help you get your students on the path to success today!

**Founded upon evidenced-based practices and predictors for effective transition planning, program participants work toward becoming proficient in the following areas:**

- Independent living
- Community participation
- Personal financial literacy
- Self-determination
- Problem solving
- Social communication
- Basic technology and social media
- Employment preparation and attainment
