PROGRAMMING WITH GAME AND WEB DESIGN

Industry Overview

Careers in programming with game and web design related jobs are in very high demand. From software developers and programmers to game designers, web developers and database administrators, a career in programming with game and web design will place you on the cutting edge of constantly changing technology trends affecting all areas of business and life.

Butler Tech Programming and Software Development Program Overview

Using project-based learning activities, students create programs using C#, VB.net, C++, and Java. In doing so, students learn to create various types of desktop and mobile application programs including video games and virtual reality software apps. Use the newest technology and equipment to program a robot, use a 3D printer and more.
