

SENIOR ONLY

WELDING LAB

Accelerate your future by earning in-demand industry credentials at a Butler Tech Adult Education Campus during your senior year of high school.

Senior Only Programs provide the opportunity for all seniors who reside within Butler Tech's Career-Technical Planning District (CTPD) to obtain industry credentials while they are still in high school to jump-start their future and increase their earning potential.

Programming Overview

- Courses are one year long, half-day instruction, four days per week
- There is no tuition cost for Welding
- Traditional fees for uniforms and textbooks apply. The instructor will provide pricing
- Students must take their academic courses online or at their current high school
- Students must provide their own transportation
- Students must provide their own meals; food service is not provided
- Continuing education opportunities are available through Butler Tech's Adult Education programming after graduation
- Any senior with good academic standing for graduation within Butler Tech's Career-Technical Planning District (CTPD) may apply
- Student's home school counselor must sign off on the student's graduation plan

There are nearly 400,000 welders, solderers, cutters, and brazers employed across the country and as the economy recovers, there will be even more demand for these areas of expertise.

- U.S. Bureau of Labor Statistics

Welding Program Overview

Senior Only Welding offers twelfth graders, in good academic standing, the opportunity to explore the vast possibilities in the welding industry in this one year, half-day program. With in-depth training using the latest technologies, the creative and literal sparks will fly as students gain hands-on experience for a lucrative career. No matter how sophisticated technology becomes, welding continues to play a vital role in building and repair, ships, cars, spacecraft, medical equipment, and thousands of other manufactured products.
