

# Discover CAREER BASED INTERVENTION

The Career Based Intervention Program is a career-technical program designed for students in grades 7-12 who are eligible based on academic and/or economic need. The CBI Program is designed to help students improve academic competence, graduate from high school, develop employability skills, set goals and implement a career plan, and participate in a career pathway in preparing for post-secondary education and future careers.

This course provides students with an opportunity to meet the academic needs for graduation while allowing for students to maintain appropriate employment within the business world. Students must meet the criteria set by the Butler Technology and Career Development Schools for both employment and academic eligibility. The CBI Program primarily uses computer-aided instruction to deliver curriculum materials. Students also earn a half credit of electives each semester in a teacher-led course called Related. This course addresses life and job skills students need for the future.
