

Senior Only EMT Program

EMS Textbook Information

The link listed below will take you to the webpage where you will order your Firefighting textbook for the program. This book will be used during your Junior and senior year. The cost of the textbook is \$134.36 (subject to change)

You are welcome to order the textbook from another vendor but I can assure you this is a very competitive price compared to others on the internet. If you choose to order from another vendor, make sure you are ordering the correct book and edition. The book we are currently using is the **“Emergency Care and Transportation of the Sick and Injured”, 12th Edition**

John D. Preuer & Associates, Inc. is where we recommend you purchase the textbook from. When you go to their page, click on the link in the top right corner of the page titled Schools. Then click on Butler Tech and it will take you directly to the textbook required for the program. You only need the book listed above, not the firefighting book. Follow their purchasing directions from there.
